FOR IMMEDIATE RELEASE

GREYHAWK EXPANDS INTERNATIONALLY

WOODBURY, NY – GREYHAWK continues to expand its client and project base with the addition of Anthony Caletka as Managing Director of International Operations where he will be responsible for initiatives originating out of New York and London, England. Mr Caletka’s distinguished career includes program, project, and construction management services; he has also served as an expert witness on numerous construction disputes throughout Europe. A trained civil engineer, Mr. Caletka most recently held the position of Managing Director at a specialist consulting firm (Keane Associates) and has held director-level positions at the leading engineering firm of URS/O’Brien-Kreitzberg, Ltd.

Gary Berman, President and CEO of GREYHAWK, says, “Tony and I worked together over 15 years ago so his joining is a reunion of sorts. It’s a great way to celebrate GREYHAWK’s 10th anniversary in that our long-term strategy always included expanding our international client base by providing consulting services to the power and renewable energy sectors. Tony’s experience, providing expert witness services on large international civil engineering projects and high profile litigation such as Wembley National Stadium, will increase the name recognition of GREYHAWK to law firms and employers overseas.”

(more)

Mr. Caletka is a co-author of the Society of Construction Law's Delay and Disruption Protocol (eot.protocol.com) and is a Fellow of the Planning Engineer's Organisation (www.planningengineers.org). His seventeen years of experience includes resolving disputes on projects involving extra work, concurrent delays, differing site conditions, acceleration, escalation, and quantifying the effects of disruption and inefficient working. He is invited to speak regularly at seminars and in-house functions on the application and development of these topics. Mr Caletka has participated in and facilitates the successful negotiation of many disputes in Arbitration (ICC, ICE & UNCITRAL), Litigation and Dispute Review Boards.

GREYHAWK (www.greyhawk.com) is an award-winning construction management and international consulting firm managing over a billion dollars of construction for approximately 40 active projects. With nearly 100 employees in offices in New York, New Jersey, Texas, and London, England, Inc. magazine labeled GREYHAWK as one of the fastest-growing companies in America. Long Island Business News recently listed the firm as one of the Top 25 Fastest-Growing Companies, while Zweig White, an international construction think-tank, placed the company on its published "Hot Firm 100" list for the last four years.
