### *GREYHAWK GLOBAL, LTD. AND SIGMA ENERGY SOLUTIONS, INC. JOIN FORCES TO PROVIDE EXPANDED SERVICES TO POWER AND ENERGY CLIENTS*

WOODBURY, NY - November 6, 2006 – Gary Berman, President of **Greyhawk**, and Luis Gonzalez, President of **Sigma**, have announced the formation of a joint collaboration to provide owners, sellers and operators of power generation facilities and project finance professionals with an unparalleled resource for due diligence assessment solutions.

The broad range of superior construction management and consulting services resulting from this alliance includes:

- Property and equipment condition evaluation assessments
- Budgets and strategies for
  - “Greenfield” developments
  - Distressed asset turnaround
  - Project completion, commissioning and start-up management
- Equipment upgrades and modernization
- Regulatory and permit issue compliance
- Lifecycle cost and remaining useful life analysis
- Financial guidance
- Risk management
- Cash flow and asset recommendations
- On-site engineer representative services
- Expert testimony for dispute resolution

Greyhawk began as a regional construction management firm in 1996, and quickly diversified its services to include program management and a full range of international consulting services for owners, multi-national EPC contractors and financial institutions. Today, Greyhawk is a market leader in project advisory services with a focus on streamlining project schedules, controlling costs and planning project delivery methods with its clients. This latest collaboration with Sigma has combined Greyhawk’s extensive experience in managing challenging construction projects with the experience of a market leader in providing due diligence to power plant operations services. This alliance will provide plant owners and operators with a single-source for comprehensive due diligence and consulting services.

“We are thrilled to announce our strategic alliance with Sigma, a market leader in engineering, consulting and due diligence for power plants and related facilities,” said Berman. “Our shared philosophy of providing stellar services to enable owners to manage complex challenges efficiently and effectively will result in innovative strategies for the world’s leading power and energy businesses.” Added Sigma’s Gonzalez, “For decades we have served the needs of power and energy businesses and infrastructure clients. As technology changes, we are pleased to offer expanded resources in developing state-of-the-art, quality due diligence services to our core market.”

### **About Sigma**

*Sigma Energy Solutions Inc., ([www.sigenergy.com](http://www.sigenergy.com)) a wholly owned subsidiary of ALSTOM Power Inc., provides consulting services, studies, plant assessments, owner’s engineer services, due diligence, technology assessments, expert analysis and testimony, and detailed engineering and design in all areas of the power, energy and infrastructure businesses. Sigma has the capability to address all types of power plant technologies including nuclear, coal, gas, waste-to-energy, oil, IGCC and renewable energy.*

### **About Greyhawk**

*Greyhawk ([www.greyhawk.com](http://www.greyhawk.com)) is an award-winning program/construction management and international consulting firm providing services to the industrial, commercial and institutional markets. With employees at eight offices in New York, New Jersey, Texas and the United Kingdom, Greyhawk has been named by **Inc.** magazine as one of the fastest-growing companies in America. Greyhawk is a leading provider of scheduling, cost engineering, and construction services for power, energy and sustainable building projects.*
