RICHARD P. ANASTASIO, P.E. NAMED HEAD OF GREYHAWK'S NORTHEAST REGION CONSTRUCTION MANAGEMENT OPERATIONS

NEW YORK—May 30, 2007—GREYHAWK announced today that Richard “Rick” Anastasio has been tapped as the head of the firm’s Northeast Region Construction Management practice. Rick has been with GREYHAWK for over 10 of the firm’s 11 years of operation and has been associated with the construction industry for his entire career as an entrepreneur, company president, contract administrator, manager of cost control and estimating, and construction manager. As a Senior Principal of GREYHAWK, Rick’s new role as the head of operations for construction management in the Northeast Region which operates from offices in Woodbury, Manhattan, Long Island City and Binghamton, is a result of the firm’s five-year strategic planning initiative. He will also continue to lead GREYHAWK’s surety practice nationwide.

GREYHAWK has recently won a number of new New York project awards, including being named construction manager for The Milton School Gymnasium Addition, the company’s second project at the Rye City School District in Westchester County. The firm will also continue on a multi-year expansion and renovation program for the Mamaroneck Schools in Westchester. Other recent GREYHAWK project awards include work on a new office headquarters for WE ACT, a LEED Gold project in Harlem that incorporates some innovative, environmentally-friendly construction techniques. The Manhasset School District on Long Island has selected GREYHAWK as its Construction Manager for a multi-school renovation program; and the NYC Health and Hospitals Corporation has chosen GREYHAWK for a term contract to provide Construction Management services for multiple health care construction projects. Rick will oversee management of these new assignments and will continue to guide GREYHAWK’s strategic growth in the Northeast regional marketplace.

According to GREYHAWK President, Gary Berman, “Rick’s extensive experience and reputation for achieving client satisfaction on even the most complex assignments will be tremendous assets to the Northeast Region’s Construction Management practice. His strong leadership style and commitment to GREYHAWK’s success are critical to our organization’s strategic growth plan for the next five years.”

Rick has been involved with the design or construction of refinery projects, chemical and food processing plants, power plants, cogeneration facilities, pollution control facilities, material handling facilities, transportation systems, marine construction, and research facilities.

Rick previously served as head of the petrochemical division for a noted, national mechanical contractor,

where he built in and around the refineries of Getty Oil in Delaware City; Mobil/Paulsboro in Pennsylvania; Sun Oil in Marcus Hook, Pennsylvania; and a number of other similar projects in Texas. Prior to that, he served as Director of Construction and Administrator of Contracts for Chemico Air Pollution Control, which built chemical plants and air pollution control systems nationwide.
